Subject: Microsoft Settlement

Dear DOJ,

I believe that Microsoft deserves fair and unbiased treatment. I am a supporter of Windows and of Microsoft integrating features. When the computer companies started, I could not afford the great features of the Apple and had to stick with a Vic 20. While dating myself a bit, I found Microsoft to be the only company willing to bring computing down to a level I could afford and my family could understand.

Please stop the nonsense. There are bigger fish such as Credit Card Companies that need to be stopped and Oil and Car companies that should be providing better alternatives and more fuel efficient cars.

If you have any questions, please feel free to email back.

Thank you,

Tworome@aol.com
